

Aeromaster Composting Systems

WORKSHOP

March 23-25, 2010
Sonora, CA

For Consistently High Quality Compost...

Aeromaster Composting Systems (ACS) workshops are designed to teach you the three different aspects of succeeding in today's composting business.

- First, we explain the many benefits of manufacturing **ACS Certified Humus Compost**.
- In addition, we take you through the processes of **high quality** compost production.
- Finally, we show you how to make your composting operation a **profitable** one.

ACS Compost Workshops are located near **actual compost production facilities** that use ACS processes and methods. During visits to the compost site we will demonstrate what was taught in the classroom in a real working environment. This hands-on time at the compost site will increase your confidence level so that you yourself can begin to produce highly effective organic compost for profit.

Compost site demonstrations include windrow building, compost turning, watering and microbial inoculation techniques, and the use of compost process monitoring instruments. The sessions also include production troubleshooting as well as the tips on increasing compost quality without increasing costs.

Seating is limited... reserve now!

Workshop Fee: \$795 (\$700 for additional attendees from same company)

\$50 Discount if payment is received by March 12, 2010.
